Discrete Mathematics
Volume 210, Numbers 1–3, 6 January 2000

Contents

Preface

P. Leroux and D. Stanton 1

Contributions

S.A. Abramov, M. Petkovšek and A. Ryabenko
Special formal series solutions of linear operator equations 3

E.M. Feichtner and D.N. Kozlov
On subspace arrangements of type $\mathcal{D}$ 27

S. Feretić
An alternative method for q-counting directed column-convex polyominoes 55

O. Guibert
Stack words, standard Young tableaux, permutations with forbidden subsequences and planar maps 71

Hoang Ngoc Minh and G. Jacob
Symbolic integration of meromorphic differential systems via Dirichlet functions 87

W.P. Johnson
Some polynomials associated with up-down permutations 117

G. Melançon
Lyndon factorization of sturmian words 137

M. Schlosser
Summation theorems for multidimensional basic hypergeometric series by determinant evaluations 151

B. Sturmfels
Solving algebraic equations in terms of $\mathcal{A}$-hypergeometric series 171

Author index to volume 210 183
